Module D1.2 Practical Work Report
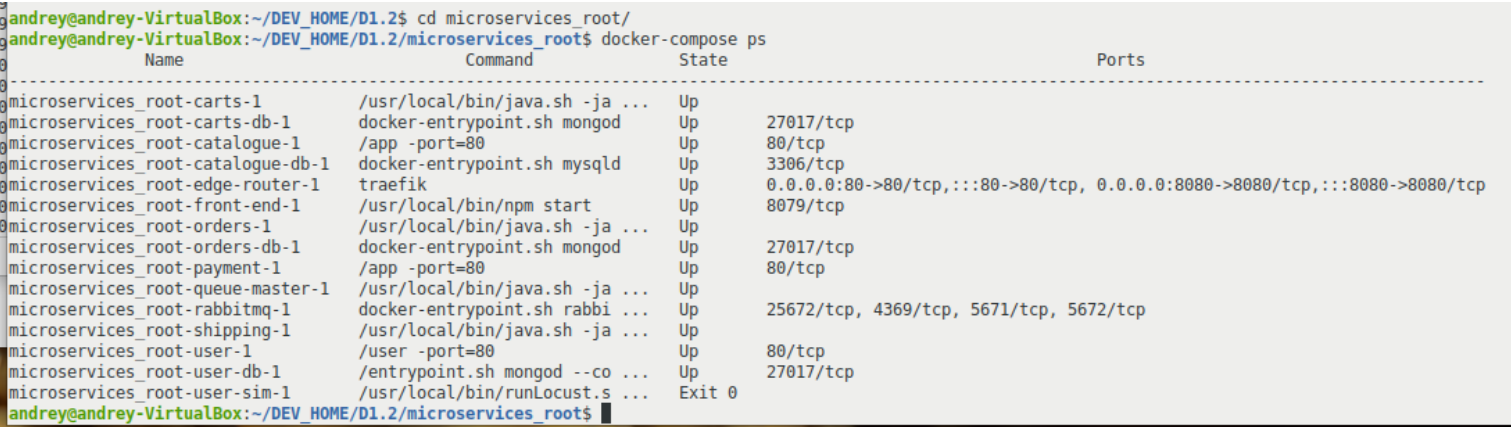

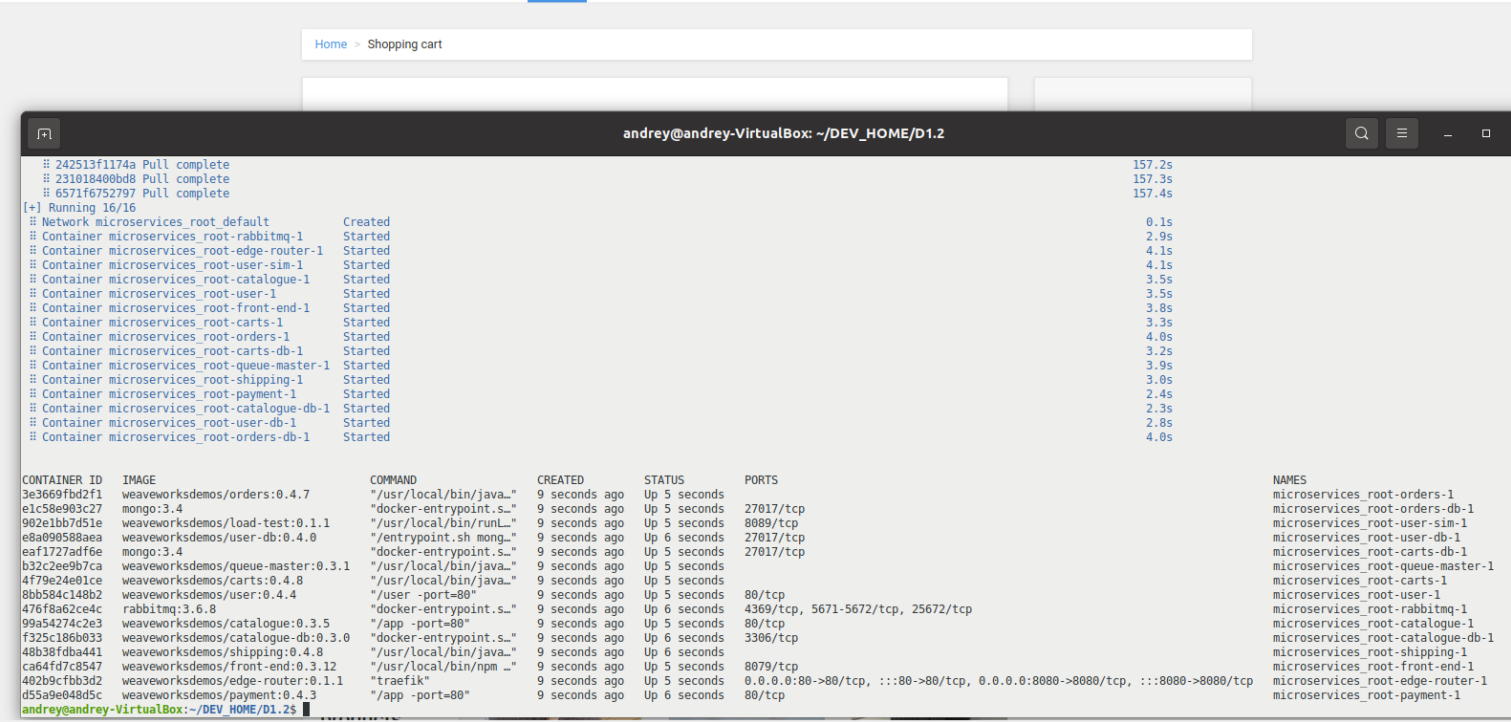

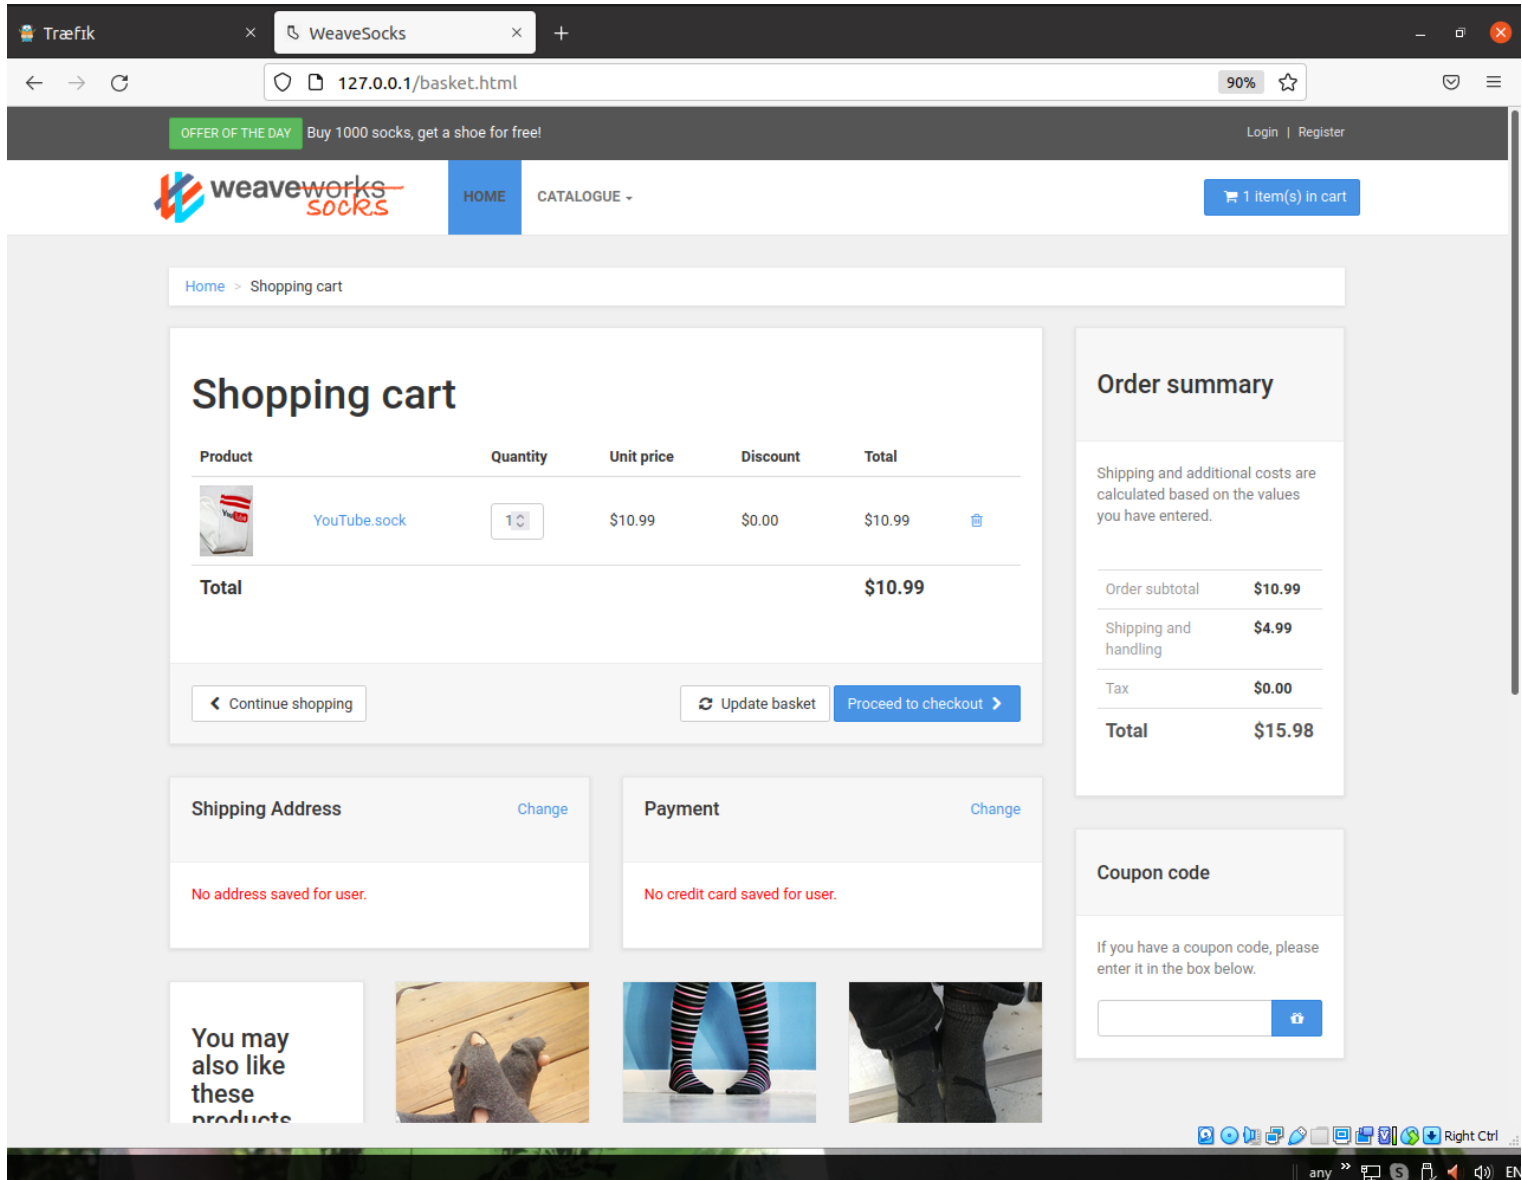

Задание:

1. Скачайте конфигурацию поднятия локальной копии интернет-магазина для *Docker Compose*.
2. Поднимите все сервисы из этого файла.
3. Убедитесь, что проект успешно поднялся. Для этого:
   - Проверьте, что все сервисы успешно запущены (*docker-composeps*).
   - Зайдите через браузер в локальную копию интернет-магазина и убедитесь, что проект работает.
4. **Отправьте скриншот списка всех контейнеров**, работающих в этом проекте.
5. Понаблюдайте в логах, какой сервис отвечает при взаимодействии с сайтом при переходе в каталоги, корзину покупателя и оформление заказа (*docker-compose logs -f*).
6. **Отправьте скриншот** записей из логов работы различных сервисов этого проекта. Например, логи работы сервиса доставки и БД.
7. Сверните проект, чтобы не осталось лишних контейнеров.

"docker volume rm" requires at least 1 argument.
See 'docker volume rm --help'.

Usage:  docker volume rm [OPTIONS] VOLUME [VOLUME...]

Remove one or more volumes
Error response from daemon: bridge is a pre-defined network and cannot be removed
Error response from daemon: host is a pre-defined network and cannot be removed
6fd99fcd8bff
Error response from daemon: none is a pre-defined network and cannot be removed
